hackuity

Bringing *clarity* to cyber vulnerability chaos.

Hackuity is the Vulnerability Operations Platform that gives you a unified, actionable view of your exposure across assets and vulnerabilities, helping teams orchestrate remediation actions and reduce cyber risk.

The EU Exposure Management Platform

AI-Powered Exposure Management

AGGREGATE

Hackuity centralizes, normalizes, and deduplicates data from 130+ leading security tools into a single pane of glass.

PRIORITIZE

Hackuity prioritizes your most critical vulnerabilities with contextual risk scoring powered by our proprietary True Risk Score and CTI.

REMEDIATE

Hackuity automates your remediation processes and streamlines collaboration between your production and security teams.

130+ connectors to unify your cyber data.

99.9% reduction in noise caused by CVSS.

70% of VM processes are automated.
