# New Document Viewer Tool

S&P Capital IQ Pro's new AI-powered Document Viewer Tool allows you to efficiently discover, analyze, and extract information from text-based content.

Key Features

Smart Search

Efficiently retrieve from filings, press releases, investor presentations and transcripts those SaaS-related data points that are crucial to your software technology analysis.

– Smart natural language search with synonym support.

– Filter results by company, index, and list or geography, industry, and date.

– See a list of all snippets containing relevant keywords within a given document.

– Click on any snippet to navigate to that reference in the document.

Table Export

Download formatted tables from a filing to build financial models.

Entities Mentioned

Quickly identify competing banks that provide credit facilities to prospects and current customers by using the Entities Mentioned feature.

– View a list of the companies mentioned in a document, and link directly to their Corporate Profile pages.
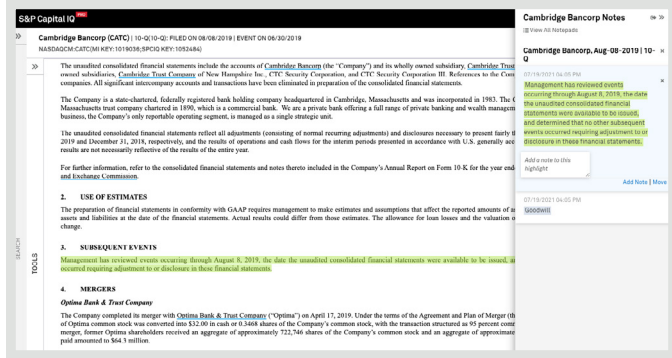

Linking

Share direct links to relevant documents and excerpts with your colleagues.

Notepads

Use notes and highlights to collate information on analyst questions and executive responses during earnings calls.

Similar Tables

Use Similar Tables to pull a company's operating metrics over multiple years to do a side-by-side comparison and calculate growth.

– Available across 10-Ks, 10-Qs, 20-Fs, and 40-Fs.

Current Coverage

– Global Transcripts

– Global Presentations

– Global Filings

Access

All S&P Capital IQ Pro users can access the new **Document Viewer Tool** via the **Apps** or **Tools** tab on the top navigation bar. Note: Your profile settings will determine whether you have Apps or Tools.
