Why Celigo?

Integration made easy: Start creating without coding

iPaaS built for CIOs to non-technical business users and everyone in between

- **Scalability:** Scale your integrations to meet the demands of your business today, and tomorrow.
- **Visibility:** Gain clear insights into your integrated processes, improving decision-making and operational efficiency.
- **Simplicity:** Complex integration tasks become straightforward, freeing up your IT resources for strategic initiatives.

#1 ranked iPaaS on G2 among 235+ competing solutions

Customers win with Celigo

Titan Brands: Titan Brands, expanding rapidly from 50 to over 3,000 SKUs, leveraged Celigo to automate their burgeoning order volume, saving them \$240,000 to \$400,000 annually and empowering both technical and non-technical team members to streamline operations for continued double-digit growth.

CDC Foundation: Overcoming unique and highly customized integration challenges, the CDC Foundation used Celigo to streamline operations, resulting in significant time savings and reduced manual workload.

Ember Technologies: Facing inefficiencies in orders and fulfillment processes, Ember Technologies turned to Celigo for a solution that supported multi-store functionality, eliminating manual correction efforts and enhancing customer satisfaction.

The value of Celigo

With Celigo, businesses experience unparalleled efficiency, improved data quality, and enhanced security. Our platform is conducive to nurturing customer satisfaction and facilitating business growth. Current and past customers have seen a ~364% ROI* by transforming their integration processes with Celigo's reliable and easy-to-use iPaaS solution.

*Total Economic Impact™ (TEI) study conducted by Forrester

“The change with Celigo was noticeable right away. Finally, the sales teams had the invoice and payment status data in Salesforce they needed after asking for this functionality for two years. Everything that we promised to the users just worked. It was a huge success.”

Katia Malashyna-de Jong
Financial Systems Director
WeTransfer

Eric Flippo
Director of IT
Home Chef

“The automation of our staffing processes took away manual work and dramatically changed our labor models. Not only did we save a ton of effort, but we got data integrity, and we no longer have all the errors which affect people's payroll and pay rates.”
