Global Expansion:

Simplify Financial Consolidation and Compliance Across Borders

Managing multiple subsidiaries and entities is one of the most complex challenges for companies with a global presence. Financial consolidation, intercompany transactions, and compliance with varying regulations in different jurisdictions can quickly become overwhelming.

A reliable Enterprise Resource Planning (ERP) system like Oracle NetSuite is essential for streamlining these processes.

FEATURES

Multi-Company Financial Consolidation

Financial consolidation involves aggregating the financial data of several subsidiaries into a single parent company's report. The process includes eliminating intercompany transactions, currency conversion, and standardizing financial statements across all subsidiaries. This level of consolidation ensures accurate and real-time financial data, enabling better strategic decision-making

Subsidiary Management Oracle NetSuite

Automates financial consolidation across multiple entities, offering capabilities such as real-time roll-up of Financial data, customizable financial reports, and automatic currency conversion. The platform also allows organizations to easily comply with international accounting standards like IFRS and GAAP, simplifying the entire process.

BENEFITS

- Quicker financial close
- Automated financial consolidation
- Real-time financial insights
- Compliance with global standards
- Efficient subsidiary management
- Process high volume of global transactions
- Support for over 190+ currencies and exchange rates
- Configurable tax engine
- Unprecedented visibility across all subsidiaries

Global Compliance and Localisation

Ensure compliance with local regulations, tax reporting, and accounting standards worldwide.

Audit Trail and Financial Transparency

Benefit from built-in audit trails, enhance transparency and simplify audits and compliance checks.

Advanced Multi-Currency Management

Manage complex multi-currency transactions, mitigate foreign exchange risks and ensure accurate financial reporting.

Built-in Business Intelligence and Analytics

Benefit from real-time analytics and customisable dashboards for strategic decision-making.

Unified ERP and CRM Platform

Seamlessly integrate financials and CRM, improve cross-departmental efficiency and visibility.

Role-Based Access and Governance

Protect sensitive data with role-based controls, and ensure only authorised personnel can access key financial information.

Automate Bank Reconciliation & Close Faster

Streamline your financial close with our end-to-end automation solution. From reconciliations to reporting, we deliver speed, accuracy, and efficiency. Our platform empowers your team to focus on strategic initiatives while automating tedious tasks. Let us help you take control of your financial operations.

Key Benefits:

Faster Financial Close

Automate repetitive tasks like reconciliations and approvals to accelerate your month-end close and reporting cycles, reducing manual effort and potential errors.

Improved Accuracy and Compliance

Ensure data consistency and accuracy with real-time visibility into financial activities, helping you meet regulatory requirements and avoid costly mistakes.

Real-Time Financial Insights

Gain full transparency into your financial performance with real-time data dashboards, enabling better decision-making and strategic planning.

OUR PRODUCTS

ORACLE NetSuite

Oracle NetSuite is a leading cloud-based enterprise resource planning (ERP) solution designed to help businesses streamline their financial, operational, and customer relationship management processes on a single integrated platform. Trusted by companies worldwide, NetSuite provides real-time visibility, automation, and scalability, empowering organisations across industries such as retail, manufacturing, financial services, and more. With robust features covering finance, accounting, CRM, inventory management, and analytics, NetSuite enables businesses to drive growth, enhance efficiency, and make data-driven decisions.

celigo

Celigo is a cloud-based integration platform (iPaaS) that connects business applications and automates workflows, enabling seamless data synchronisation across systems like ERP, CRM, e-commerce, and more. With pre-built connectors and custom integration capabilities, Celigo helps businesses eliminate data silos, improve efficiency, and accelerate growth through intelligent automation

workato

Workato is a leading enterprise automation platform that enables businesses to integrate systems and automate workflows without coding. By connecting applications like ERP, CRM, and cloud services, Workato streamlines operations, enhances collaboration, and ensures seamless data flow across organisations. Scalable and secure, it empowers teams to automate tasks efficiently, improving productivity and business agility.

BLACKLINE

BlackLine is a cloud-based finance and accounting solution designed to automate bank reconciliation, streamline financial close processes, and enhance operational efficiency. By eliminating manual accounting tasks, BlackLine enables businesses to achieve accuracy, compliance, and real-time financial visibility.

netgain

NetGain is a financial automation solution designed to streamline and accelerate the month-end close process. Built natively within NetSuite, it helps finance teams automate reconciliations, lease accounting, asset management, and cash management, reducing manual work, minimising errors, and providing real-time visibility into financial operations. Trusted by leading global companies, NetGain transforms financial close from a complex, time-consuming task into a seamless and efficient process.
