OneStream® SensibleAI™ Portfolio

AI That Works Where Finance Works

OneStream's SensibleAI Portfolio embeds purpose-built artificial intelligence (AI) capabilities directly into critical finance processes — no data science teams, disconnected tools, or long implementation cycles needed.

Built natively within the OneStream platform, SensibleAI unifies quantitative, generative, and agentic AI across planning and forecasting, close and consolidations, and reporting and analysis.

SensibleAI is delivered within the same familiar workflows, data, and security model that OneStream's finance customers worldwide trust and use.

AI-Powered Finance — Purpose-Built, Unified, and Delivered in Weeks

- **Built by Finance, for Finance:** Purpose-built AI capabilities native to the OneStream platform.
- **Unified AI — No Silos:** AI leverages the same data, security, and metadata model finance already trusts.
- **Speed to Value:** Deployed in weeks, not months, enabling customers to see value faster than ever.
- **Scalable and Extensible:** Expand use cases as needed across planning, close, reconciliation, and reporting processes.
- **Transparency and Trust:** Built-in dashboards, audit trails, and explainability for every model and prediction.

SensibleAI™ Portfolio

SOLUTIONS

SensibleAI Forecast

- **Cost-saving efficiencies** with 85%+ reduction in forecast time.
- **Improved decision making** with 25%+ more accurate predictions.
- **No-code** solution embedded within OneStream platform and processes.

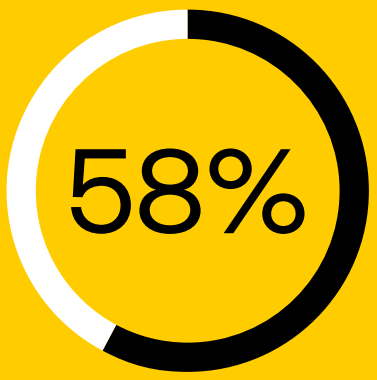
SensibleAI Studio

- Anamoly detector to **mitigate risk** within planning and close.
- **Accelerated data analysis** with natural language query capabilities.
- **Optimized system performance** with diagnostic reports and prescriptive fixes.

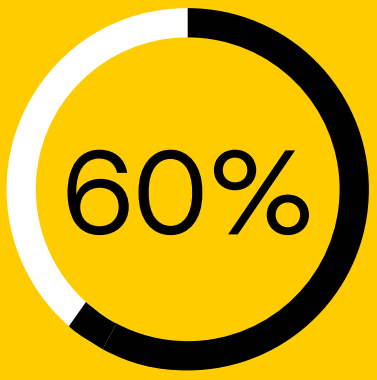
SensibleAI Agents

- Autonomous agents to **extract, interact, and visualize** data and enterprise information assets.
- **Full transparency** into model responses.
- Customer data that **remains secure**, never leaving or training external models.

Did You Know...



of finance teams in May 2024 reported having AI in various stages of production, **more than a 50% increase from 2023 levels.**



of organizations will use AI-enabled scenario planning as a **primary business partnering by 2028.**

OneStream® SensibleAI™ Portfolio

Forecast with Accuracy and Speed

SensibleAI Forecast enables highly accurate time-series forecasting powered by machine learning (ML), no coding or external tools required. Unlike do-it-yourself AI toolkits or standalone vendors, SensibleAI Forecast is ready to deploy today — delivering results in weeks, not months or years.

- 25%+ average forecast accuracy improvement.
- 85%+ average reduction in time to create forecasts.
- Built-in explainability dashboards and narrative summaries.

Build and Extend AI Use Cases

SensibleAI Studio empowers finance teams and developers with a suite of prebuilt AI algorithms, workflows, and no-code tools to rapidly create and scale custom solutions.

- 60+ reusable plug-and-play AI routines (e.g., anomaly detection, system diagnostics, data manipulation).
- Click-to-Configure blocks to easily embed AI in workflows.
- Faster implementation and improved data quality.

Work Smarter with AI-Powered Agents

SensibleAI Agents are financially intelligent digital team members — purpose-built to analyze, synthesize, and act on financial and operational data. Whether combing through documents, surfacing insights, or running complex analyses, these agents extend your finance team with intelligent support that works at machine speed.

- **Finance Analyst:** Explore cube data, visualize results, and detect anomalies.
- **Operations Analyst:** Explore transactional and operational data and visualize results.
- **Search Agent:** Instantly find and interpret content from OneStream and enterprise documents.
- **Deep Analysis Agent:** Extract, refine, aggregate, and summarize textual and image data from thousands of documents to generate deep analysis and actionable insights.

Customer Success

STAKE CENTER LOCATING℠

Stake Center Locating, a leading professional services company in the locating industry, struggled with creating forecasts due to the variable nature of projects and client demands. Similarly, the company faced challenges in predicting workload and resource allocation for underground utility locating services.

With SensibleAI Forecast, Stake Center Locating achieved a 15 – 20% improvement in forecast accuracy, shifting from quarterly to weekly forecasting, improving operational efficiency, and saving millions.

Delaware North

Delaware North, a global hospitality and entertainment company, is transforming their “coin in” forecast by game type by casino. Using SensibleAI Forecast, Delaware North was able to produce a 93% accurate forecast at the monthly level for 2024 using industry-specific variables & events. Forecast generation now only takes 30 minutes.
